Changing SMTP Ports:				
Service level 2 under function in body in pre-advance series, under function, network in advance series. SMTPTXPN is Port to Change				
Other info:				
http://windows.microsoft.com/en-us/windows/outlook/send-receive-from-app				
For ports: **465 and 587 SSL requred**				
Some email (such as GMX) providers support multiple ports for SMTP; Most of them swtiching to SSL due to security concerns				
http://forums.comcast.com/t5/E-Mail-and-Xfinity-Connect-Help/E-Mail-Client-Settings-customer-generated/td-p/778889				
Customers with the equipment that doesn't support SSL(iR 1023,1025 and few other) may use GMX (**free** email provider).
